DETAILED ACTION

1. The Preliminary Amendment filed on 15 March 2004 has been entered.

Specification

2. The disclosure is objected to because of the following informalities: it is suggested that the term "figure" be capitalized, e.g. Figure, FIGURE, Fig., to denote and emphasize reference to the drawing Figures.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claims call for linear alternating motion of the cutting slide "without pausing", yet this is not clearly understood to the extent that it appears a certain amount of "pause" must occur when the slide changes direction from the outward run and the return run. Mechanically, the slide must be decelerated to a stop (and thereby a "pause") prior to change of direction. If the Examiner is in error, then please provide clarification.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. In claim 1, e.g., the phrase "...without pausing" is vague and indefinite in that it is not clear what the phrase encompasses. As noted above under § 112, first paragraph, it is not clear, mechanically, how no pause would occur in such a movement.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. As best understood, claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kusakabe. Note Fig. 5.
